Schedule for Development / Monitoring / Review

This Online Safety policy was approved by the Board of Directors on:	<i>June 2023</i>
The implementation of this Online Safety policy will be monitored by the:	<i>Senior Leadership Team / All staff</i>
Monitoring will take place at regular intervals:	<i>Annually</i>
The Board of Director will receive a report on the implementation of the Online Safety Policy generated by the monitoring group (which will include anonymous details of online safety incidents) at regular intervals:	<i>Annually</i>
The Online Safety Policy will be reviewed annually, or more regularly in the light of any significant new developments in the use of the technologies, new threats to online safety or incidents that have taken place. The next anticipated review date will be:	<i>June 2025</i>
Should serious online safety incidents take place, the following external persons / agencies should be informed:	<i>DSO, LA Safeguarding Officer, LADO, Police</i>

The school will monitor the impact of the policy using:

- Logs of reported incidents
- Monitoring logs of internet activity/ filtering

Scope of the Policy

This policy applies to all members of the school / school community (including staff, students, volunteers, parents / carers, visitors) who have access to and are users of school digital technology systems, both in and out of the school.

The Education and Inspections Act 2006 empowers Headteachers / Principals to such extent as is reasonable, to regulate the behaviour of students / pupils when they are off the school site and empowers members of staff to impose disciplinary penalties for inappropriate behaviour. This is pertinent to incidents of online bullying or other Online Safety incidents covered by this policy, which may take place outside of the school, but is linked to membership of the school. The 2011 Education Act increased these powers with regard to the searching for and of electronic devices and the deletion of data (see appendix for template policy). In the case of both acts, action can only be taken over issues covered by the published Behaviour Policy.

The school will deal with such incidents within this policy and associated behaviour and anti-bullying policies and will, where known, inform parents / carers of incidents of inappropriate Online Safety behaviour that take place out of school.

Roles and Responsibilities

The following section outlines the online safety roles and responsibilities of individuals and groups within the school:

Board of Directors

Directors are responsible for the approval of the Online Safety Policy and for reviewing the effectiveness of the policy. This will be carried out by the Directors receiving regular information about online safety incidents and monitoring reports, including:

- regular meetings with the Headteacher
- regular monitoring of online safety incident logs
- regular monitoring of filtering / change control logs
- reporting to relevant Board meetings

Headteacher and Senior Leadership Team

- The Headteacher has a duty of care for ensuring the safety (including online safety) of members of the school community.
- The Headteacher and (at least) another member of the Senior Leadership Team should be aware of the procedures to be followed in the event of a serious online safety allegation being made against a member of staff. (see flow chart on dealing with online safety incidents – included in a later section – “Responding to incidents of misuse”)
- The Headteacher is responsible for ensuring that relevant staff receive suitable training to enable them to carry out their online safety roles and to train other colleagues, as relevant.
- The Headteacher will ensure that there is a system in place to allow for monitoring and support of those in school who carry out the internal online safety monitoring role. This is to provide a safety net and also support to those colleagues who take on important monitoring roles. Any incidents should be discussed with the Headteacher at the first available opportunity.
- The Senior Leadership Team will receive regular monitoring reports.
- Takes day to day responsibility for online safety issues and has a leading role in establishing and reviewing the school’s online safety policy
- Ensures that all staff are aware of the procedures that need to be followed in the event of an online safety incident taking place.
- Provides training and advice for staff
- Liaises with the Local Authority / relevant body
- Liaises with technical staff (Cracking IT/Smoothwall)
- Receives reports of online safety incidents and creates a log of incidents to inform future online safety developments (Cracking IT/Smoothwall)
- Meets regularly with Safeguarding (Headteacher) to discuss current issues, review incident logs and filtering logs
- Attends relevant meetings
- Refers incidents directly to the Headteacher

Network Manager

The Network Manager is responsible for ensuring:

- that the school's technical infrastructure is secure and is not open to misuse or malicious attack
- that the school meets required online safety technical requirements and the Online Safety Policy guidance that may apply.
- that users may only access the networks and devices through a properly enforced password protection policy, in which passwords are regularly changed
- the filtering policy is applied and updated on a regular basis and that its implementation is not the sole responsibility of any single person.
- that they keep up to date with online safety technical information in order to effectively carry out their online safety role and to inform and update others as relevant
- that the use of the network / internet / email is regularly monitored in or
- der that any misuse / attempted misuse can be reported to the Headteacher / members of the Senior Leadership Team/ for investigation / action / sanction
- that monitoring software / systems are implemented and updated as agreed in school policies

Teaching and Support Staff

Are responsible for ensuring that:

- they have an up-to-date awareness of online safety matters and of the current school Online Safety Policy and practices
- they have read the ICT and Internet Acceptable Use Policy
- they report any suspected misuse or problem to the Headteacher / Senior Leadership Team
- all digital communications with students / pupils / parents / carers should be on a professional level and only carried out using official school systems
- online safety issues are embedded in all aspects of the curriculum and other activities
- students / pupils understand and follow this Online Safety Policy and ICT and Internet Acceptable Use Policy
- students / pupils have a good understanding of research skills and the need to avoid plagiarism and uphold copyright regulations
- they monitor the use of digital technologies, mobile devices, cameras etc in lessons and other school activities (where allowed) and implement current policies with regard to these devices
- in lessons where internet use is pre-planned students / pupils should be guided to sites checked as suitable for their use and that processes are in place for dealing with any unsuitable material that is found in internet searches

Designated Safeguarding Lead / DDSL

Should be trained in Online Safety issues and be aware of the potential for serious child protection / safeguarding issues to arise from:

- sharing of personal data
- access to illegal / inappropriate materials

- inappropriate on-line contact with adults / strangers
- potential or actual incidents of grooming
- online-bullying

Students / Pupils

- are responsible for using the school's digital technology systems in accordance with the ICT and Internet Acceptable Use Policy
- have a good understanding of research skills and the need to avoid plagiarism and uphold copyright regulations
- need to understand the importance of reporting abuse, misuse or access to inappropriate materials and know how to do so
- will be expected to know and understand policies on the use of mobile devices and digital cameras. They should also know and understand policies on the taking / use of images and on online-bullying.
- should understand the importance of adopting good online safety practice when using digital technologies out of school and understand that the school's Online Safety Policy covers their actions out of school, if related to their membership of the school

Parents / Carers

Parents / Carers play a crucial role in ensuring that their children understand the need to use the internet / mobile devices in an appropriate way. The school will take every opportunity to help parents understand these issues through parents' coffee mornings, meetings, website and information about national / local online safety campaigns / literature. Parents and carers will be encouraged to support the school in promoting good online safety practice and to follow guidelines on the appropriate use of:

- digital and video images taken at school events
- their children's personal devices in the school

Policy Statements

Education – Students

Whilst regulation and technical solutions are very important, their use must be balanced by educating students to take a responsible approach. The education of students in online safety / digital literacy is therefore an essential part of the school's online safety provision. Children and young people need the help and support of the school to recognise and avoid online safety risks and build their resilience.

Online safety should be a focus in all areas of the curriculum and staff should reinforce online safety messages across the curriculum. The online safety curriculum should be broad, relevant and provide progression, with opportunities for creative activities and will be provided in the following ways:

- A planned online safety curriculum should be provided as part of Computing / PHSE and should be regularly revisited
- Key online safety messages should be reinforced as part of a planned programme of tutorial
- / pastoral activities
- Students should be taught in all lessons to be critically aware of the materials / content they

access on-line and be guided to validate the accuracy of information.

- Students should be taught to acknowledge the source of information used and to respect copyright when using material accessed on the internet
- Students should be supported in building resilience to radicalisation by providing a safe environment for debating controversial issues and helping them to understand how they can influence and participate in decision-making.
- Students should be helped to understand the need for the ICT and Internet Acceptable Use Policy and encouraged to adopt safe and responsible use both within and outside school.
- Staff should act as good role models in their use of digital technologies, the internet and mobile devices
- In lessons where internet use is pre-planned, it is best practice that students should be guided to sites checked as suitable for their use and that processes are in place for dealing with any unsuitable material that is found in internet searches.
- Where students are allowed to freely search the internet, staff should be vigilant in monitoring the content of the websites the young people visit.
- It is accepted that from time to time, for good educational reasons, students may need to research topics (eg racism, drugs, discrimination) that would normally result in internet searches being blocked. In such a situation, staff can request that the Technical Staff (or other relevant designated person) can temporarily remove those sites from the filtered list for the period of study. Any request to do so, should be auditable, with clear reasons for the need.

Education – Parents / Carers

Many parents and carers have only a limited understanding of online safety risks and issues, yet they play an essential role in the education of their children and in the monitoring / regulation of the children's online behaviours. Parents may underestimate how often children and young people come across potentially harmful and inappropriate material on the internet and may be unsure about how to respond.

The school will therefore seek to provide information and awareness to parents and carers through:

- Curriculum activities
- Letters, newsletters, web site
- Parents / Carers meetings
- High profile events / campaigns e.g. Safer Internet Day
- Reference to the relevant web sites / publications e.g.
 - swgfl.org.uk
 - www.saferinternet.org.uk/
 - <http://www.childnet.com/parents-and-carers>
 - CEOP
 - Think U Know
 - Online Safety Alliance

Education and Training – Staff

It is essential that all staff receive online safety training and understand their responsibilities, as outlined in this policy. Training will be offered as follows:

- A planned programme of formal online safety training will be made available to staff. This will be regularly updated and reinforced.
- All new staff should receive online safety training as part of their induction programme, ensuring that they fully understand the school Online Safety Policy and ICT and Internet Acceptable Use Policy.
- It is expected that some staff will identify online safety as a training need within the performance management process.
- The Headteacher will receive regular updates through attendance at external or online training events and by reviewing guidance documents released by relevant organisations.
- This Online Safety Policy and its updates will be presented to and discussed by staff in briefings, INSET days and weekly CPD sessions.
- The Headteacher will provide advice / guidance / training to individuals as required. Training materials will be provided by the Online Safety Alliance.

Training – Directors

Directors should be aware of online safety training / awareness sessions. This may be offered in a number of ways:

- Attendance at training provided by the National Governors Association or the Online Safety Alliance.
- Participation in school information sessions for staff.

Technical – Infrastructure / Equipment, Filtering and Monitoring

The school will be responsible for ensuring that the school network is as safe and secure as is reasonably possible and that policies and procedures approved within this policy are implemented. It will also need to ensure that the relevant people named in the above sections will be effective in carrying out their online safety responsibilities.

A more detailed Technical Security Policy is in place for this school.

- School systems will be managed in ways that ensure that the school meets recommended technical requirements stated in the Technical Security Policy.
- There will be regular reviews of the safety and security of school systems
- Servers, wireless systems and cabling must be securely located and physical access restricted
- All users will have clearly defined access rights to school systems and devices.
- All users will be provided with a username and secure password by the Network Manager (ICT4) who will keep an up-to-date record of users and their usernames. Users are responsible for the security of their username and password and will be required to change their password every 90 days. Students in the school use a ‘Pupil’ logon.
- The “administrator” passwords for the school ICT systems, used by the Network Manager must

also be available to the Headteacher or other nominated senior leader and kept in a secure place.

- The Network Manager is responsible for ensuring that software licence logs are accurate and up to date and that regular checks are made to reconcile the number of licences purchased against the number of software installations.
- Internet access is filtered for all users. Illegal content (child sexual abuse images) is filtered by the broadband or filtering provider by actively employing the Internet Watch Foundation CAIC list. Content lists are regularly updated, and internet use is logged and regularly monitored. There is a clear process in place to deal with requests for filtering changes contained in the Technical Security Policy.
- Internet filtering / monitoring should ensure that children are safe from terrorist and extremist material when accessing the internet.
- The school has provided differentiated user-level filtering for students and staff.
- School technical staff regularly monitor and record the activity of users on the school technical systems and users are made aware of this in the ICT and Internet Acceptable Use Policy.
- An appropriate system is in place as part of the ICT and Internet Acceptable Use Policy for users to report any actual / potential technical incident / security breach to the relevant person, as agreed.
- Appropriate security measures are in place to protect the servers, firewalls, routers, wireless systems, workstations, mobile devices etc from accidental or malicious attempts which might threaten the security of the school systems and data. The school infrastructure and individual workstations are protected by up-to-date virus software.
- An agreed policy is in place in the form of a ‘supply teacher’ logon for the provision of temporary access of “guests” (eg trainee teachers, supply teachers, visitors) onto the school systems.
- An agreed policy is in place regarding the extent of personal use that users (staff / students) are allowed on school devices that may be used out of school.
- An agreed policy is in place that forbids staff from downloading executable files and installing programmes on school devices.
- An agreed policy is in place regarding the use of removable media (eg memory sticks / CDs / DVDs) by users on school devices. Personal data cannot be sent over the internet or taken off the school site unless safely encrypted or otherwise secured.

Mobile Technologies (Including BYOD/BYOT)

Mobile technology devices may be school owned/provided or personally owned and might include smartphone, tablet, notebook / laptop or other technology that usually has the capability of utilising the school’s wireless network. The device then has access to the wider internet which may include the school’s learning platform and other cloud-based services such as email and data storage.

All users should understand that the primary purpose of the use mobile / personal devices in a school context is educational. The mobile technologies policy should be consistent with and inter-related to

other relevant school policies including but not limited to the Child Protection and Safeguarding Policy, Positive Behaviour Policy, Anti-Bullying Policy. Teaching about the safe and appropriate use of mobile technologies should be an integral part of the school's Online Safety education programme as part of the ICT/ Computing and PSHE curriculums.

- The school ICT and Internet Acceptable Use for staff /students and parents / carers will give consideration to the use of mobile technologies
- The school allows:

	School Devices			Personal Devices		
	School owned for single user	School owned for multiple users	Authorised device ¹	Student owned	Staff owned	Visitor owned
Allowed in school	Yes	Yes	Yes	Yes	Yes	Yes
Full network access	Yes	Yes	Yes	No	No	No
Internet only				Yes	Yes	No
No network access						

Use of Digital and Video Images

The development of digital imaging technologies has created significant benefits to learning, allowing staff and students instant use of images that they have recorded themselves or downloaded from the internet: however, staff, parents / carers and students need to be aware of the risks associated with publishing digital images on the internet. Such images may provide avenues for cyberbullying to take place. Digital images may remain available on the internet forever and may cause harm or embarrassment to individuals in the short or longer term. It is common for employers to carry out internet searches for information about potential and existing employees. The school will inform and educate users about these risks and will implement policies to reduce the likelihood of the potential for harm:

- When using digital images, staff should inform and educate students about the risks associated with the taking, use, sharing, publication and distribution of images. In particular they should recognise the risks attached to publishing their own images on the internet e.g. on social networking sites.
- Written permission from parents or carers will be obtained before photographs of students are published on the school website / social media / local press
- In accordance with guidance from the Information Commissioner's Office, parents / carers are welcome to take videos and digital images of their children at school events for their own personal use (as such use is not covered by the Data Protection Act). To respect everyone's privacy and in some cases protection, these images should not be published / made publicly available on social networking sites, nor should parents / carers comment on any activities

involving other students in the digital / video images.

- Staff and volunteers are allowed to take digital / video images to support educational aims, but must follow school policies concerning the sharing, distribution and publication of those images. Those images should only be taken on school equipment; the personal equipment of staff should not be used for such purposes.
- Care should be taken when taking digital / video images that students are appropriately
- Dressed and are not participating in activities that might bring the individuals or the school into disrepute.
- Students must not take, use, share, publish or distribute images of others without their permission
- Photographs published on the website, or elsewhere that include students will be selected carefully and will comply with good practice guidance on the use of such images.
- Students' full names will not be used anywhere on a website or blog, particularly in association with photographs.
- Student's work can only be published with the permission of the student and parents or carers.

Data Protection

Personal data will be recorded, processed, transferred and made available according to the current data protection legislation 2018.

The school must ensure that:

- It has a Data Protection Policy.
- It has paid the appropriate fee to the Information Commissioner's Office (ICO).
- It has appointed a Data Protection Officer (DPO).
- It will hold the minimum personal data necessary to enable it to perform its function and it will not hold it for longer than necessary for the purposes it was collected for.
- Data held must be accurate and up to date. Inaccuracies are corrected without unnecessary delay.
- The lawful basis for processing personal data (including, where relevant, consent) has been identified and documented and details provided in a Privacy Notice.
- Where special category data is processed, a lawful basis and a separate condition for processing have been identified.
- Data Protection Impact Assessments (DPIA) are carried out.
- It has clear and understood arrangements for access to and the security, storage and transfer of personal data, including, where necessary, adequate contractual clauses or safeguards where personal data is passed to third parties e.g. cloud service providers.
- Procedures must be in place to deal with the individual rights of the data subject i.e. a Subject Access Requests to see all or a part of their personal data held by the data controller.
- There are clear and understood data retention policies and routines for the deletion and

disposal of data.

- There is a policy for reporting, logging, managing and recovering from an information risk incident which recognises the requirement to report relevant data breaches to the ICO within 72 hours of the breach, where feasible.
- Consideration has been given to the protection of personal data when accessed using any remote access solutions.
- All schools must have a Freedom of Information Policy which sets out how it will deal with FOI requests.
- All staff receive data handling awareness / data protection training and are made aware of their responsibilities.
- At all times take care to ensure the safe keeping of personal data, minimising the risk of its loss or misuse.
- Use personal data only on secure password protected computers and other devices, ensuring that they are properly “logged-off” at the end of any session in which they are using personal data.
- Transfer data using encryption and secure password protected devices.

When personal data is stored on any portable computer system, memory stick or any other removable media:

- The data must be encrypted and password protected.
- The device must be password protected.
- The device must offer approved virus and malware checking software.
- The data must be securely deleted from the device, in line with school policy (below) once it has been transferred or its use is complete.

Communications

A wide range of rapidly developing communications technologies has the potential to enhance learning. The following table shows how the school currently considers the benefit of using these technologies for education outweighs their risks / disadvantages:

	Staff & other adults				Students / Pupils			
	Allowed	Allowed at certain times	Allowed for selected staff	Not allowed	Allowed	Allowed at certain times	Allowed with staff permission	Not allowed
Communication Technologies								
Mobile phones may be brought to the school	x						x	
Use of mobile phones in lessons		x					x	
Use of mobile phones in social time	x						x	
Taking photos on personal mobile phones / cameras				x				x
Use of other mobile devices e.g. tablets, gaming devices		x					x	
Use of personal email addresses in school, or on school network				x				x
Use of school email for personal emails				x				NA
Use of messaging apps				x				x
Use of social media				x				x
Use of blogs				x				x

When using communication technologies, the school considers the following as good practice:

- The official school email service may be regarded as safe and secure and is monitored. Users should be aware that email communications are monitored. Staff and students should therefore use only the school email service to communicate with others when in school, or on school systems.
- Users must immediately report to the nominated person – in accordance with the school policy, the receipt of any communication that makes them feel uncomfortable, is offensive, discriminatory, threatening or bullying in nature and must not respond to any such communication.
- Any digital communication between staff and students or parents / carers must be professional in tone and content. These communications may only take place on official (monitored) school systems. Personal email addresses, text messaging or social media must not be used for these

communications.

- Students should be taught about online safety issues, such as the risks attached to the sharing of personal details. They should also be taught strategies to deal with inappropriate communications and be reminded of the need to communicate appropriately when using digital technologies.
- Personal information should not be posted on the school website and only official email addresses should be used to identify members of staff.

Social Media - Protecting Professional Identity

All schools, academies, MATs and local authorities have a duty of care to provide a safe learning environment for pupils and staff. Schools /academies, MATs and local authorities could be held responsible, indirectly for acts of their employees in the course of their employment. Staff members who harass, engage in online bullying, discriminate on the grounds of sex, race or disability or who defame a third party may render the school or local authority / MAT liable to the injured party. Reasonable steps to prevent predictable harm must be in place.

The school provides the following measures to ensure reasonable steps are in place to minimise risk of harm to pupils, staff and the school through:

- Ensuring that personal information is not published
- Training is provided including: ICT and Internet acceptable use; social media risks; checking of settings; data protection & reporting issues.
- Clear reporting guidance, including responsibilities, procedures and sanctions

School staff should ensure that:

- No reference should be made in social media to students, parents, carers or school staff
- They do not engage in online discussion on personal matters relating to members of the school community
- Personal opinions should not be attributed to the school
- Security settings on personal social media profiles are regularly checked to minimise risk of loss of personal information

When official school social media accounts are established, there should be:

- A process for approval by senior leaders
- Clear processes for the administration and monitoring of these accounts – involving at least two members of staff
- A code of behaviour for users of the accounts, including
- Systems for reporting and dealing with abuse and misuse
- Understanding of how incidents may be dealt with under school disciplinary procedures

Personal Use:

- Personal communications are those made via a personal social media accounts. In all cases, where a personal account is used which associates itself with the school or impacts on the

- school, it must be made clear that the member of staff is not communicating on behalf of the school with an appropriate disclaimer. Such personal communications are within the scope of this policy.
- Personal communications which do not refer to or impact upon the school are outside the scope of this policy
- Where excessive personal use of social media in school is suspected, and considered to be interfering with relevant duties, disciplinary action may be taken
- The school permits reasonable and appropriate access to private social media sites if there is a specific need to do so.

Monitoring of Public Social Media

- As part of active social media engagement, it is considered good practice to pro-actively monitor the Internet for public postings about the school
- The school should effectively respond to social media comments made by others according to a defined policy or process

The school's use of social media for professional purposes will be checked regularly by the senior risk officer and Online Safety Director to ensure compliance with the school policies.

Dealing with Unsuitable / Inappropriate Activities

Some internet activity e.g. accessing child abuse images or distributing racist material is illegal and would obviously be banned from school and all other technical systems. Other activities e.g. cyber-bullying would be banned and could lead to criminal prosecution. There are however a range of activities which may, generally, be legal but would be inappropriate in a school context, either because of the age of the users or the nature of those activities.

The school believes that the activities referred to in the following section would be inappropriate in a school context and that users, as defined below, should not engage in these activities in the school when using school equipment or systems. The school policy restricts usage as follows:

User Actions		Acceptable	Acceptable at certain times	Acceptable for nominated users	Unacceptable	Unacceptable and illegal
Users shall not visit Internet sites, make, post, download, upload, data transfer, communicate or pass on, material, remarks, proposals or comments that contain or relate to:	Child sexual abuse images –The making, production or distribution of indecent images of children. Contrary to The Protection of Children Act 1978					X
	Grooming, incitement, arrangement or facilitation of sexual acts against children Contrary to the Sexual Offences Act 2003.					X
	Possession of an extreme pornographic image (grossly offensive, disgusting or otherwise of an obscene character) Contrary to the Criminal Justice and Immigration Act 2008					X
	Criminally racist material in UK – to stir up religious hatred (or hatred on the grounds of sexual orientation) - contrary to the Public Order Act 1986					X
	Pornography				X	
	Promotion of any kind of discrimination				X	
	threatening behaviour, including promotion of physical violence or mental harm				X	
	Promotion of extremism or terrorism				X	
	Any other information which may be offensive to colleagues or breaches the integrity of the ethos of the school or brings the school into disrepute				X	
Using school systems to run a private business					X	
Using systems, applications, websites or other mechanisms that bypass the filtering or other safeguards employed by the school					X	
Infringing copyright					X	
Revealing or publicising confidential or proprietary information (eg financial / personal information, databases, computer / network access codes and passwords)					X	
Creating or propagating computer viruses or other harmful files					X	

Unfair usage (downloading / uploading large files that hinders others in their use of the internet)				X	
On-line gaming (educational)		X			
On-line gaming (non-educational)				X	
On-line gambling				X	
On-line shopping / commerce		X			
File sharing		X			
Use of social media		X			
Use of messaging apps		X			
Use of video broadcasting e.g. youtube				x	

Responding to Incidents of Misuse

This guidance is intended for use when staff need to manage incidents that involve the use of online services. It encourages a safe and secure approach to the management of the incident. Incidents might involve illegal or inappropriate activities (see “User Actions” above).

Illegal Incidents

If there is any suspicion that the web site(s) concerned may contain child abuse images, or if there is any other suspected illegal activity, refer to the right-hand side of the Flowchart (below and appendix) for responding to online safety incidents and report immediately to the police.

Other Incidents

It is hoped that all members of the school community will be responsible users of digital technologies, who understand and follow school policy. However, there may be times when infringements of the policy could take place, through careless or irresponsible or, very rarely, through deliberate misuse.

In the event of suspicion, all steps in this procedure should be followed:

- Have more than one member of the Senior Leadership Team involved in this process. This is vital to protect individuals if accusations are subsequently reported.
- Conduct the procedure using a designated computer that will not be used by young people and if necessary, can be taken off site by the police should the need arise. Use the same computer for the duration of the procedure.

- It is important to ensure that the relevant staff should have appropriate internet access to conduct the procedure, but also that the sites and content visited are closely monitored and recorded (to provide further protection).
- Record the URL of any site containing the alleged misuse and describe the nature of the content causing concern. It may also be necessary to record and store screenshots of the content on the machine being used for investigation. These may be printed, signed and attached to the form (except in the case of images of child sexual abuse – see below)
- Once this has been completed and fully investigated the group will need to judge whether this concern has substance or not. If it does then appropriate action will be required and could include the following:
 - Internal response or discipline procedures
 - Involvement by Local Authority or national-local organisation (as relevant).
 - Police involvement and or action
- If content being reviewed includes images of child abuse then the monitoring should be halted and referred to the Police immediately. Other instances to report to the police would include:
 - incidents of ‘grooming’ behaviour
 - the sending of obscene materials to a child
 - adult material which potentially breaches the Obscene Publications Act
 - criminally racist material
 - promotion of terrorism or extremism
 - other criminal conduct, activity or materials
- Isolate the computer in question as best you can. Any change to its state may hinder a later police investigation.

It is important that all of the above steps are taken as they will provide an evidence trail for the school and possibly the police and demonstrate that visits to these sites were carried out for safeguarding purposes. The completed form should be retained by the group for evidence and reference purposes.

School Actions and Sanctions

It is more likely that the school will need to deal with incidents that involve inappropriate rather than illegal misuse. It is important that any incidents are dealt with as soon as possible in a proportionate manner, and that members of the school community are aware that incidents have been dealt with. It is intended that incidents of misuse will be dealt with through normal behaviour / disciplinary procedures as follows:

Students Incidents	Refer to class teacher / tutor	Refer to Head of Department / Year / other	Refer to Headteacher / Principal	Refer to Police	Refer to technical support staff for action re filtering / security etc.	Inform parents / carers	Removal of network / internet access rights	Warning	Further sanction eg detention / exclusion
--------------------	--------------------------------	--	----------------------------------	-----------------	--	-------------------------	---	---------	---

Deliberately accessing or trying to access material that could be considered illegal (see list in earlier section on unsuitable / inappropriate activities).		X	X	X					
Unauthorised use of non-educational sites during lessons	x				x		x	x	
Unauthorised / inappropriate use of mobile phone / digital camera / other mobile device			x					x	
Unauthorised / inappropriate use of social media / messaging apps / personal email			x		x			x	
Unauthorised downloading or uploading of files			x		x		x	x	
Allowing others to access school network by sharing username and passwords			x		x	x	x	x	
Attempting to access or accessing the school network, using another student's account	x						x	X	
Attempting to access or accessing the school network, using the account of a member of staff	x		x		x	x			
Corrupting or destroying the data of other users			x		x	x	x	x	
Sending an email, text or message that is regarded as offensive, harassment or of a bullying nature			x	x	x	x	x	x	X
Continued infringements of the above, following previous warnings or sanctions			x	x	x	x	x	x	x
